Some people have an idea of what they want to make, and others just want to make something. These are possible content areas for projects. **Circle** the ones that you wouldn't mind including or being in a project. (You may also draw an "X" or line through anything that you wouldn't want to do.)

Ex: ☒ I like this thing.

Ex: ☐ This is boring.

Everybody knows how busy kids and their families can be! About how much time would you hope to spend on a project? (You can estimate per week, per month or total time.)

Check the box in front of the statement that seems the **most** true:

☐ I really enjoy working with several other people as part of a team.

☐ I prefer to work on projects by myself.

☐ Sometimes I like to work independently, other times with others. It depends.

Is there anything else you'd like to tell us? Use the back too!
